Education

Delhi Technological University **2023 – 2027**
B.Tech in Software Engineering - 8.86/10 *Delhi*

Maxfort School Dwarka **2023**
Class XII - CBSE - 95% *Sector-7, Dwarka, New Delhi*

Maxfort School Dwarka **2021**
Class X - CBSE - 94.6% *Sector-7, Dwarka, New Delhi*

Experience

Coforge Technologies Limited **June 2026 – July 2026**
Graduate Engineer Trainee *On-site*

- Engineered robust error-handling mechanisms and activity-tracking logs across primary software modules, accelerating issue identification and strengthening system security audits.
- Architected detailed database blueprints and schema field guides, enabling seamless cross-team navigation of complex data structures and ensuring consistent data governance.

DLED Labs, IIT Ropar **January 2026 – March 2026**
Software Engineering Intern *Remote*

- Achieved a 100% completion on the Vibe platform's MERN stack track, solving Web Dev and Data Science problems.
- Built end-to-end **MERN applications** featuring **RESTful APIs**, secure **JWT authentication**, and **MongoDB** schemas.
- Refactored code bases under senior mentorship, fixing **critical multi-module bugs** to enhance state handling, code quality, and **Git** workflows.

Projects

Roamwise — AI Travel Planner | *Next.js, React, Tailwind CSS, PostgreSQL* | **Live** | **GitHub**

- Built a full-stack **AI travel planner** with **Next.js**, **React**, **TypeScript**, **Google Gemini API**, and **OpenStreetMap Nominatim** to generate personalized, editable day-by-day itineraries with destination geocoding and map links.
- Designed reliable AI workflows using **structured JSON** and **Zod validation** for itinerary generation, AI trip revisions, destination briefings, and travel-diary creation, with deterministic fallback mode for no-key previews.
- Developed secure trip management with **Supabase Auth**, **PostgreSQL**, and **Prisma ORM**, including persistent saved trips, packing lists, a travel journal for notes/ photos, and categorized expense tracking against trip budgets.

QuickCart — Full-Stack E-Commerce Platform | *Next.js, React, Tailwind CSS, MongoDB* | **Live** | **GitHub**

- Developed a full-stack **e-commerce platform** using **Next.js**, **React**, and **Tailwind CSS**, delivering responsive product discovery, search, cart, checkout, address management, order tracking, and seller/admin dashboards.
- Added secure backend workflows with **Next.js API Routes**, **MongoDB/Mongoose**, **Clerk-based RBAC**, and **React Context** to manage products, users, carts, orders, inventory, coupons, and role-specific access.
- Integrated **Razorpay** for online/COD payments, **Cloudinary** for product-media storage, and **Inngest** for event-driven user synchronization, abandoned-payment inventory recovery, and scheduled health monitoring.

Object Detection and Classification | *Python, PyTorch, Torchvision, Scikit-learn, OpenCV, Flask* | **GitHub**

- Created an end-to-end **20-class object recognition pipeline** on the **Pascal VOC 2012** dataset, parsing XML annotations for **17,125 images** and **40,138 object instances**; performed data-quality checks and exploratory analysis.
- Extracted **2,048-dimensional ResNet-50 embeddings** from annotated object crops and trained **Logistic Regression**, Random Forest, and Decision Tree models using stratified splits and **10-fold cross-validation**.
- Achieved **87.25% accuracy**, **87.22% weighted F1-score**, and **0.993 macro AUC**; deployed a sliding-window inference workflow with **confidence thresholding** and **consensus voting** to reduce false positives.

Skills

- **Languages:** C/C++, JavaScript, TypeScript, Python, Java, SQL
- **Frameworks & Libraries:** Next.js, React, Flask, Tailwind CSS, PyTorch, Torchvision, Scikit-learn, OpenCV, Mongoose
- **Databases & Cloud Services:** MongoDB, PostgreSQL, Supabase, Cloudinary, Clerk, Razorpay, Inngest
- **Developer Tools & Platforms:** Git/GitHub, VS Code, Neovim
- **CS Fundamentals & CourseWork:** Data Structures & Algorithms, System Design, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Cyber Security, Internet of Things

Achievements & Certifications

- Won **1st place** at Execute 5.0 Hackathon organized by the E-Cell, Delhi Technological University.
- **Machine Learning Specialization** — Andrew Ng, Coursera
- Awarded a Trophy for securing the highest marks in Computer Science in my school in the 12th CBSE Boards exams.
